

When Petrotech-Peru needed Customized Superior® Engine & Compressor Packages...

EnDyn's "ReMan Solutions" was just a call away!

EnDyn's PowerParts® Team recently provided Petrotech with a customized "ReMan Solution" for their three (3) 16SGT/MW66 7,350 HP packages in Talara, Peru. Why did Petrotech think "EnDyn ReMan?"

Because they knew that our remanufactured parts and assemblies would cut their costs up to 40% vs. new and guarantee a shorter delivery to the field. And, EnDyn ReMan gives them the added assurance of parts machined to "zero-hour, as-new" tolerances with a one-year warranty (equal to that of OEM new.)

They also knew our in-house engineering expertise could customize packages to their exact specifications, and we'd be right by their side for the installation, commissioning, and start-up.

EnDyn's PowerParts® Team has been providing solutions like these for companies in the oil and gas industry for over 25 years. If you have a ReMan project for a Superior® or Ajax® package, the EnDyn Team is just a call away. Isn't it time you think ReMan?

EnDyn - Your global resource for sales, service and manufacturing of quality PowerParts® for Superior® and Ajax® engines and compressors.

The global
resource to
the energy
industry.
